INTRODUCTION

Info

Disclaimer

Make your code readable. Pretend the next person who looks at your code is a psychopath and they know where you live.

Philip Wadler

Elegance

Elegance is a simple theme based on HSRM which allows customization of slide backgrounds.

It uses the backgrounds placed in your presentation's file tree:

- Title slide `style/images/background-title.pdf`
- Section title slide `style/images/background-section.pdf`
- Normal slide `style/images/background-slide.pdf`

LISTINGS

Other Coder

Code listings using othercoder

You can have pretty code snippets:

```
class value_gte {
public:
    value_gte(int comp)       An inline comment
        : m_comp(comp)        that explains something
    {
    }
};
```
